SUMMARY

A creative and motivated computer science graduate seeking a software development or data focused position to leverage my skills in a dynamic and challenging environment.

SKILLS

- Proficient in programming languages including C#, Python, C++, and Java.
- Skilled in data analysis, data visualization, and predictive modeling.
- Knowledge of user research methodologies, usability testing, and interaction design principles.
- Strong understanding of object-oriented programming, data structures, and the Software Development Life Cycle (SDLC).
- Strong attention to detail, creativity, and problem-solving skills.
- Excellent communication and collaboration skills with cross-functional teams.

EDUCATION

Bachelor of Science in Computer Science

Weber State University

Graduation Date: April 2025

RELEVANT COURSEWORK

- Operating Systems
- Advanced DBMS
- Data Science Algorithms
- Software Engineering
- Integral Calculus

PROJECTS

- Built a learning management system similar to Canvas with a team of five using .NET Razor Pages, Bootstrap, and SQL.
- Collaborated with a team of five to build a web application for Weber State University to streamline their grant application process, replacing the current manual system.
- Worked with a team of four to analyze how economic factors impact U.S. housing prices and built predictive models based on economic trends
